New Model Gel Chinrest Comfort Pads

An Ebony Guarneri chinrest with the Ebony GelRest & a Rosewood Guarneri chinrest with the Rosewood GelRest.

The Gel matches the wood maintaining the elegant classic styling.

Description

The GelRest is a contoured gel pad which attaches by its own naturally 'sticky' composition to your chinrest. It is therefore easy to remove to clean, and then refit, without needing re-gluing as with the previous models. It is available in 2 styles: 1st Strad / Guarneri, 2nd style, Teka / New Flesch. This new material does not degrade, in the same way that previous models did!

Rather than simply cut from a flat sheet, like other cushioning materials, gel is cast into a mould to achieve the cupped shape needed to fit the human chin and maintain the look of a traditional chinrest. The front side is slightly textured to prevent it sticking to the player, whereas the back is smooth to ensure a good 'stick' to the chin rest. The chinrest needs to be cleaned with an alcohol, such as Methylated spirits prior to application to ensure that no greasy deposits remain.

The gel material used for the GelRest contains no silicone, and is even approved by the American FDA. It's non-slip, even when wet, so holding your instrument is comfortable and effortless on hot summer days, or cool autumn nights.

Price from JPB is only £12.50 for either style or colour and is in stock!
